# FAQ:

## **Will my new poly furniture fade?**

Our furniture is protected by advanced ultra-violet stabilizers, so while no material is entirely resistant to the effects of sunlight, poly is close.

Everything people have outside, cars, houses, etc., fades in the sun, but you can expect very minor fading in poly furniture.

Think of it like vinyl siding. After many years of direct sunlight, you may see a shade difference if you compared it to a brand new piece.

## **Will I get mildew and fungus on my furniture?**

The short answer is yes.

Mildew and fungus are by-products of nature. Wherever you have a combination of shade and moisture you are likely to have mildew or fungus form on anything. The good news is that it is not harmful to poly furniture and can be cleaned by the following methods.

# How do I care for my new poly furniture?

Our poly furniture is not affected by most corrosive substances, and will not promote bacterial growth. To maintain the beauty of your furniture, simply clean it regularly with non-abrasive soap and water.

While most colors would need to be cleaned a couple times per year, lighter colors such as white or yellow may need a cleaning more often to maintain original beauty.

Do not place hot items directly on the furniture.

A good common sense rule-of-thumb for poly furniture around a fire pit—If it's hot enough that you're uncomfortable, so is the chair.

If any piece of poly furniture comes out of storage looking warped or feeling wobbly, place it in the sun for a half hour and it will relax right back into its original shape.

# How do I clean my new poly furniture?

**Embedded Dirt** - Use Dawn dish detergent and water to saturate the stain. Rinse with clean water.

**Bird Droppings** - Use a mild dish detergent to saturate the area. Scrub with a soft-bristled brush. Rinse with clean water.

**Grease or Oil Stain** - Use a Dawn dish detergent and water to saturate the stain and break up the oils. Rinse with clean water.

**Chewing Gum** - Use Dawn dish detergent to saturate the area. Scrub with a soft-bristled brush and rinse clean with water. Coat penetrating oil over the area. Gently and carefully pry up on any hard pieces with a plastic putty knife. Rinse with clean water.

**Stains & Scuffs** - A foam eraser sponge may be used for stubborn marks.

**Ink/Marker** - For tougher stains, treat area with a penetrating oil. Wipe off and wash with water and Dawn dish detergent. Rinse with clean water.

Do not clean your poly furniture with a scrub pad (Scotch Brite, steel wool, etc.). Use a mild cleaning agent that is approved for use on plastics, such as Dawn dish detergent, Simple Green, Formula 409, or any of the new environmentally safe and natural products. Household bleach diluted with water (1:10 bleach to water ratio) and a little dish detergent is an effective solution for removing mold and fungus and will not harm your furniture in any way.

Keep pressure under 2,000 PSI. DO NOT spray too close to the furniture. More difficult spots such as tar, lawn mower tire marks and tree sap can be cleaned off with mineral spirits or a similar product. These tougher spots may require a little more effort, use a little elbow grease!
